Kit 410 - ResQmax Line Deployment Kit

Description

The ResQmax Kit 410 is a Line Deployment Kit supplied with two payloads and all the accessories required to operate the ResQmax.

The Dacron Line is a messenger line which allows for long range horizontal deployment distances of 400ft / 122m. This line can be used to tow larger, stronger ropes across a canyon, river, or other large distance which can not easily be accessed by foot.

The Polyspectra Line has a stronger test strength of 2,200 lbs / 1,000 kg and is intended to be used in water-based operations which require the line to float.

The ResQmax Streamline Filler Hose facilitates charging the projectiles with compressed air from an Air Compressor, an SCBA Tank, or a SCUBA Tank. The service pressure of these projectiles is 3,000 psi / 207 bar.

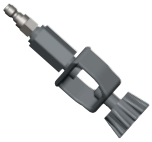

This kit comes complete with spares and a Kit Carry Bag for easy transport and storage. Optional accessories include the ResQmax Tool Kit, and a Rigid Transport/Storage Case. Additional projectiles and lines are available with all of the ResQmax Kits.

Shipping Dimensions: 25 x 21 x 14" - 28 lbs
